

CSC-PROJECT

KUSUMAPRIYA

2000030148

QUES :

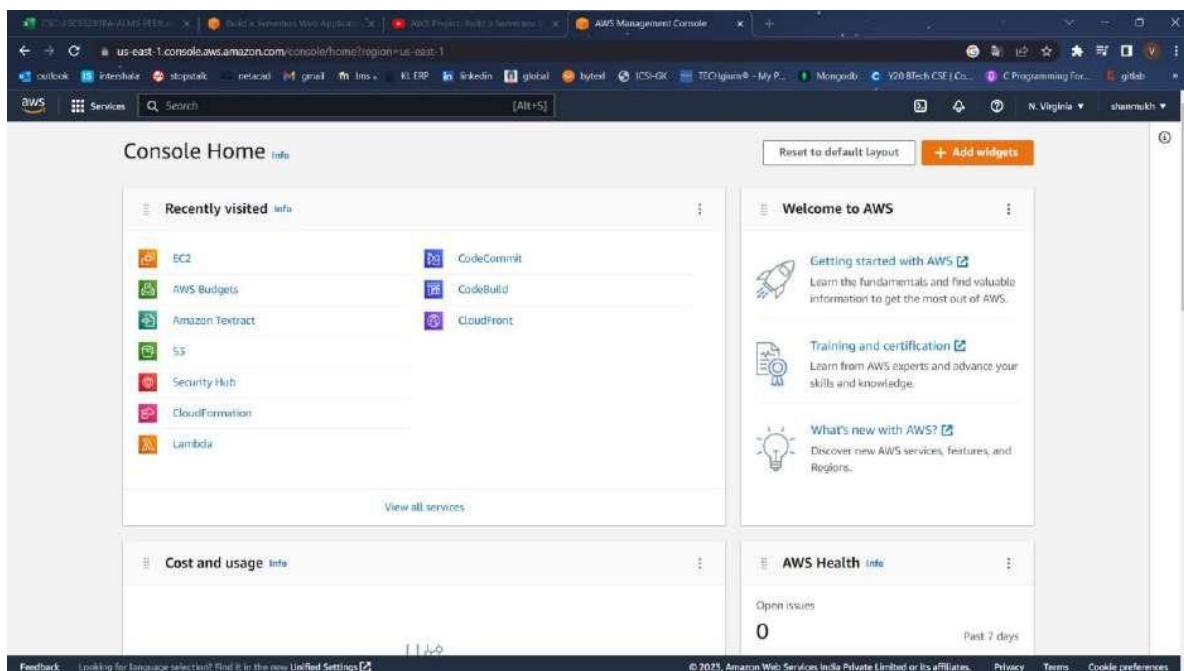

Serverless Web Application on Aws cloud
simple leave management system build
with Aws serverless and Cdk

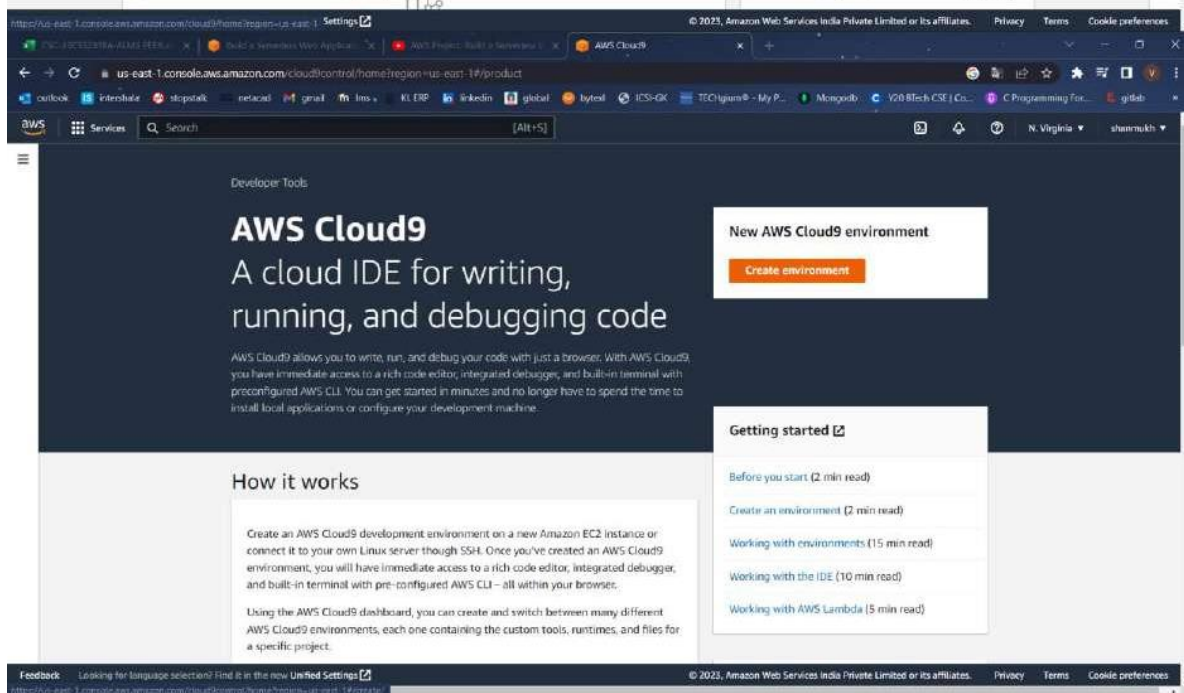

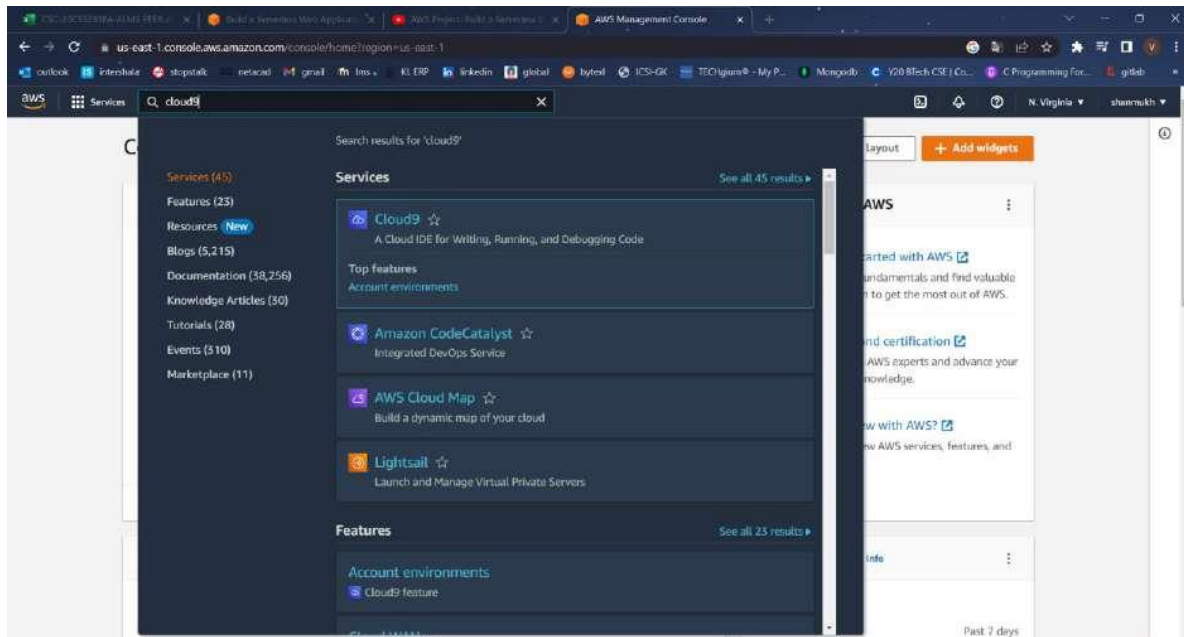

IMPLEMENTATION :

STEP 1: STATIC WEB HOSTING

→ Create the git repository

First create an environment in cloud9

us-east-1.console.aws.amazon.com/cloud/control/home/region-us-east-1#/create/

ServicesSearch[Alt+S]

Details

Name

serverless

Limit of 80 characters, alphanumeric, and unique per user.

Description - optional

Limit 200 characters.

Environment type Info

Determines what the Cloud9 IDE will run on.

☒ New EC2 instance

Cloud9 creates an EC2 instance in your account. The configuration of your EC2 instance cannot be changed by Cloud9 after creation.

☐ Existing compute

You have an existing instance or server that you'd like to use.

New EC2 Instance

Instance type Info

The memory and CPU of the EC2 instance that will be created for Cloud9 to run on.

☐ t2.micro (1 GiB RAM + 1 vCPU)

Free-tier eligible. Ideal for educational users and exploration.

☐ t3.small (2 GiB RAM + 2 vCPU)

Recommended for small web projects.

☒ m5.large (8 GiB RAM + 2 vCPU)

Recommended for production and most general-purpose development.

Platform Info

This will be installed on your EC2 instance. We recommend Amazon Linux 2.

Amazon Linux 2

Timeout

How long Cloud9 can be inactive (no user input) before auto-hibernating. This helps prevent unnecessary charges.

30 minutes

Network settings Info

Connection

How your environment is accessed.

☒ AWS Systems Manager (SSM)

Accesses environment via SSM without opening inbound ports (no logins).

☐ Secure Shell (SSH)

Accesses environment directly via SSH, opens inbound ports.

VPC settings Info

Amazon Virtual Private Cloud (VPC)

The VPC that your environment will access. To allow the AWS Cloud9 environment to connect to its EC2 instance, attach an internet gateway (IGW) to your VPC. [Create new VPC](#)

vpc-0b78862c096ee0a09

Name

Subnet

Used to setup your VPC configuration. To use a private subnet, select AWS Systems Manager (SSM) as the connection type. [Create new subnet](#)

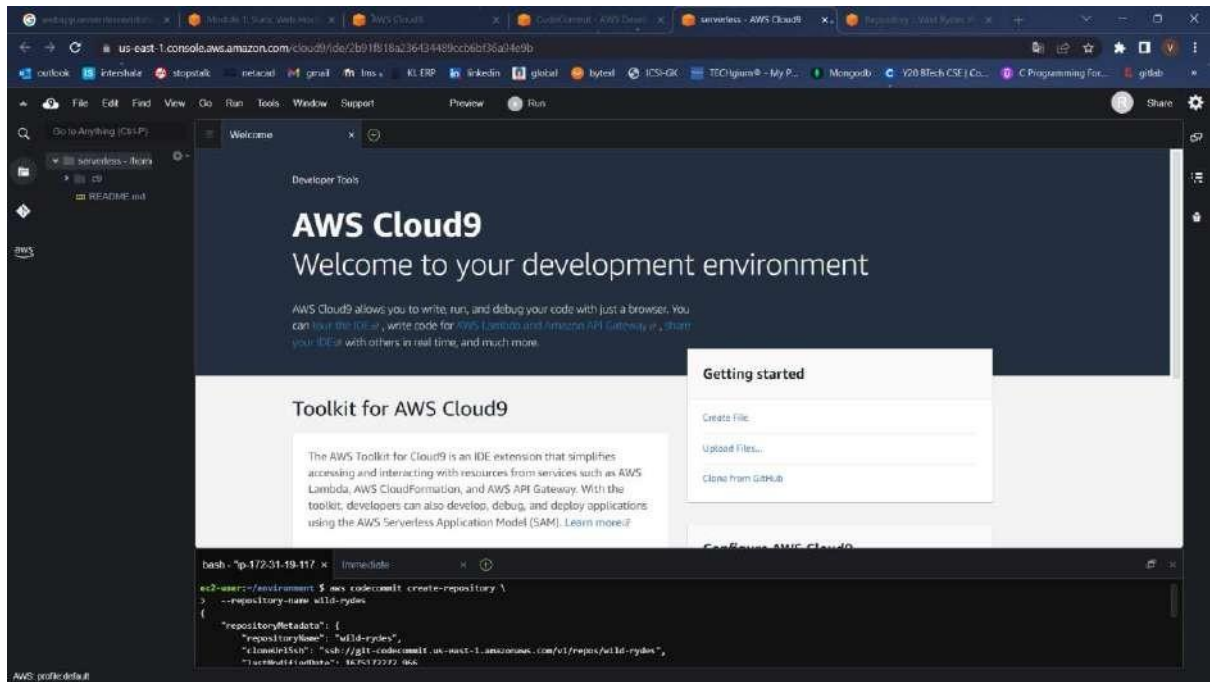

No preference

Uses default subnet in any Availability Zone.

Repository created in codecommit

The screenshot shows the AWS Cloud9 IDE interface. The left sidebar displays a file explorer with a project named 'serverless-frontend'. The main editor window shows a terminal with the following commands and output:

```
ec2-user@environment:~$ aws codecommit create-repository \
ec2-user@environment:~$ aws codecommit create-repository \
$ --repository-name wild-rydes
{
  "repositoryName": "wild-rydes",
  "cloneUrlHttp": "https://git-codecommit.us-east-1.amazonaws.com/v1/repos/wild-rydes",
  "cloneUrlSsh": "ssh://git-codecommit.us-east-1.amazonaws.com/v1/repos/wild-rydes",
  "createdDate": "2023-07-27T10:00:00.000Z",
  "accountId": "arn:aws:codecommit:us-east-1:608127336867:wild-rydes",
  "repositoryArn": "arn:aws:codecommit:us-east-1:608127336867:wild-rydes"
}
```

The terminal also shows the cloning of the repository into the local environment:

```
ec2-user@environment:~$ git clone https://github.com/awslabs/serverless-workshop.git
Cloning into 'aws-serverless-workshop' ...
remote: Enumerating objects: 972, done.
remote: Counting objects: 100% (203/203), done.
remote: Compressing objects: 100% (118/118), done.
remote: Total 972 (delta 88), reused 372 (delta 55), pack-reused 759
Receiving objects: 100% (972/972), 58.68 MiB | 52.89 MiB/s, done.
Resolving deltas: 100% (179/179), done.
ec2-user@environment:~$
```

The screenshot shows the AWS Cloud9 IDE interface with the terminal displaying the installation of git-subtree and the creation of a new branch:

```
ec2-user@environment:~$ sudo yum install git-subtree -y
Loaded plugins: extras_suggestions, langpacks, priorities, update_sudo
241 packages excluded due to repository priority protections
Resolving Dependencies
--> Package git-subtree.noarch 0:2.38.1-1.amzn2.0.1 will be installed
--> Finished Dependency Resolution

STEP 2 : USER MANAGEMENT

→Initialize AWS Amplify CLI

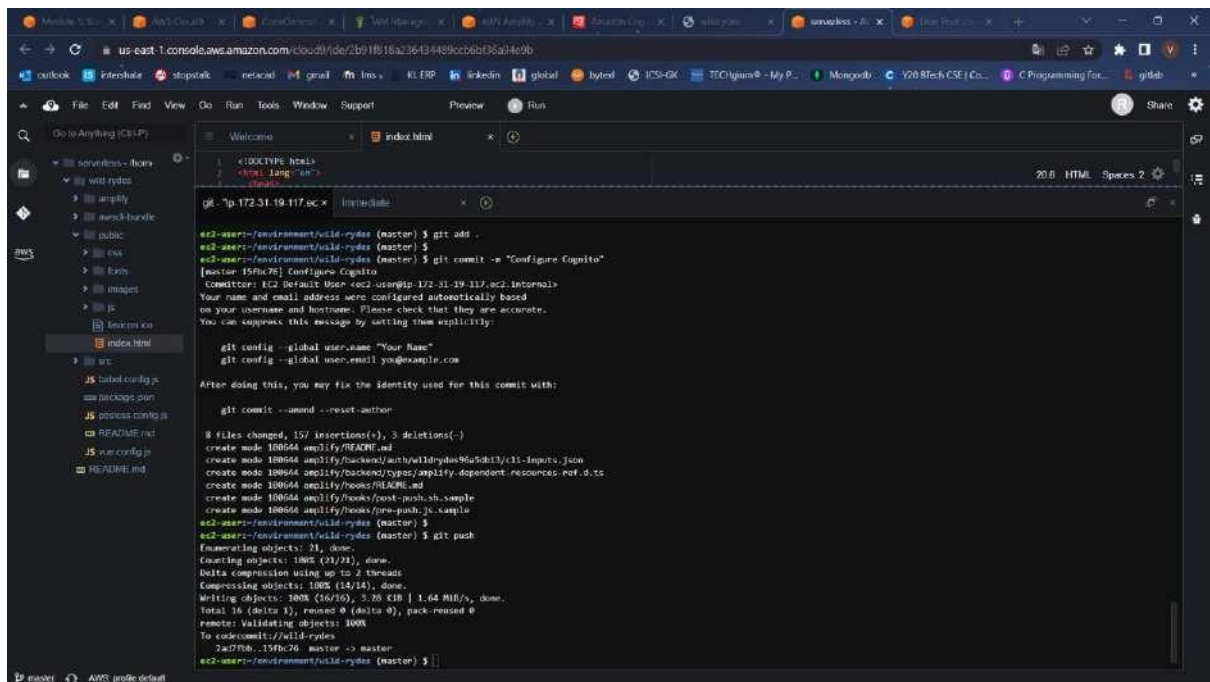

```
node -p 172.31.10.117 x
ec2-user:/environment/wild-rydes (master) $ npm install -g @aws-amplify/cli
added 26 packages, and audited 27 packages in 9s
7 packages are looking for funding
run 'npm fund' for details
found 0 vulnerabilities
ec2-user:/environment/wild-rydes (master) $ npm install -g @aws-amplify/cli
changed 26 packages, and audited 27 packages in 8s
7 packages are looking for funding
run 'npm fund' for details
found 0 vulnerabilities
ec2-user:/environment/wild-rydes (master) $ echo '[profile default]' > ~/.aws/config
ec2-user:/environment/wild-rydes (master) $
ec2-user:/environment/wild-rydes (master) $
ec2-user:/environment/wild-rydes (master) $
ec2-user:/environment/wild-rydes (master) $
ec2-user:/environment/wild-rydes (master) $
ec2-user:/environment/wild-rydes (master) $
ec2-user:/environment/wild-rydes (master) $
ec2-user:/environment/wild-rydes (master) $
ec2-user:/environment/wild-rydes (master) $
ec2-user:/environment/wild-rydes (master) $
ec2-user:/environment/wild-rydes (master) $
```

```
bash -p 172.31.10.117 x
ec2-user:/environment/wild-rydes (master) $ amplify init
Note: It is recommended to run this command from the root of your app directory
? Enter a name for the environment prod
? Choose your default editor Visual Studio Code
? Select the authentication method you want to use: aws profile
For more information on AWS Profiles, see:
https://docs.aws.amazon.com/cli/latest/userguide/cli-configure-profiles.html
? Please choose the profile you want to use default
Adding backend environment prod to AWS Amplify app: d36y2afmwvsk
Deployment completed.
Deployed root stack wildrydes [-] 4/4
amplify-wildrydes-prod-11155 AWS::CloudFormation::Stack CREATE_COMPLETE Tue Jan 31 2025 14:16:02...
DeploymentBackend AWS::IAM::Role CREATE_COMPLETE Tue Jan 31 2025 14:15:53...
AuthRole AWS::IAM::Role CREATE_COMPLETE Tue Jan 31 2025 14:15:46...
UnauthRole AWS::IAM::Role CREATE_COMPLETE Tue Jan 31 2025 14:15:46...
Deployment state saved successfully.
✓ Initialized provider successfully.
Your project has been successfully initialized and connected to the cloud!
Time next steps:
"amplify status" will show you what you've added already and if it's locally configured or deployed
"amplify add categories" will allow you to add features like user login or a backend API
"amplify push" will build all your local backend resources and provision it in the cloud
"amplify console" to open the Amplify Console and view your project status
"amplify pull" will build all your local backend and frontend resources (if you have hosting category added) and provision it in the cloud
Pro tip:
Try "amplify add api" to create a backend API and then "amplify push" to deploy everything
ec2-user:/environment/wild-rydes (master) $
```

→Create an Amazon Cognito User Pool using AWS Amplify CLI

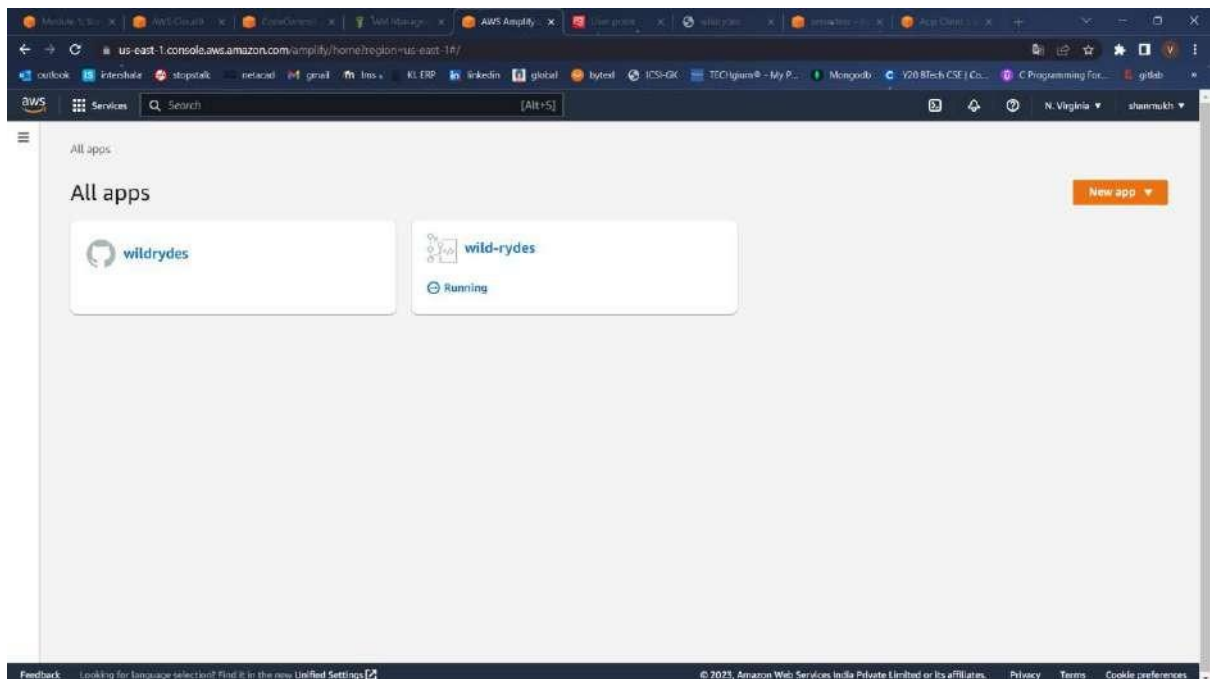

```
ec2-user@environment/wild-rydes (master) $ git add .

Allows Lambda functions to call AWS services on your behalf.

Summary

Creation date: January 31, 2023, 20:19 (UTC+05:30)

ARN: `arn:aws:iam::060127336867:role/WildRyderLambda`

Last activity: None

Maximum session duration: 1 hour

Permissions | Trust relationships | Tags | Access Advisor | Revoke sessions

Permissions policies (1)

You can attach up to 10 managed policies.

Filter policies by property or policy name and press enter:

Policy name	Type	Description
AWSLambdaBasicExecutionRole	AWS managed	Provides write permissions to CloudWatch Logs.

Permissions boundary - (not set)

Set a permissions boundary to control the maximum permissions this role can have. This is not a common setting but can be used to delegate permission management to others.

→Deploy Your API

→Update the Website Config

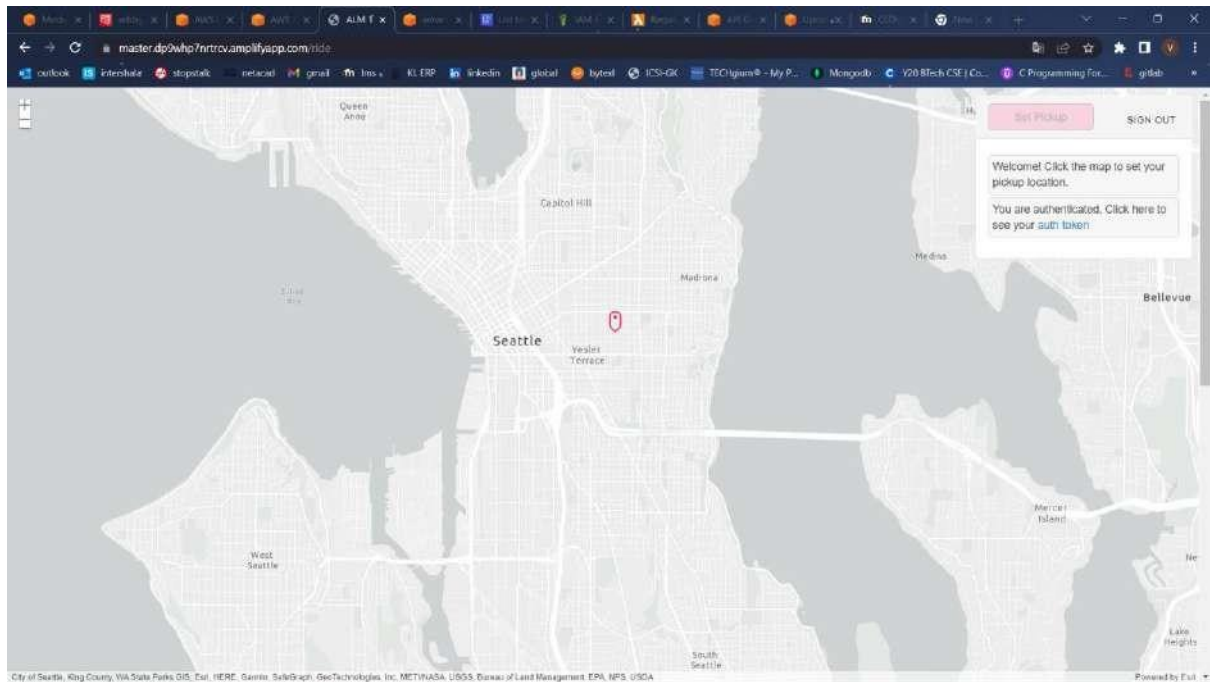

Visit /ride under your website domain.

If you are redirected to the sign in page, sign in with the user you created in the previous module.

After the map has loaded, click anywhere on the map to set a pickup location. Choose Request Unicorn.

You should see a notification in the right sidebar that a unicorn is on its way and then see a unicorn icon fly to your pickup location.

Testing completed.

STEP 5 : Cleanup all the resources created.
